Tracy,

Thank you to you and your team (Derek, Danny & Bobby) for a job well done! After experiencing our first real Hail disaster in almost 45 years of business we weren't really sure what to expect or where to start. After sitting down and going over the process you outlined I was still skeptical. But after putting our trust in you and seeing how you and your team responded I can honestly say my worries quickly disappeared. You worked efficiently to help coordinate the entire estimating process with the insurance company in order to get all of our vehicles (1500) at the Toyota and Chevrolet store evaluated in less than a week. The repair process was even more seamless. Your team worked amazingly with our sales & service staff to prioritize vehicles and get the required repairs done. The onsite managers oversaw the quality control of the work and ensured all vehicles met the standards we had established. I would gladly recommend IFS (International Fleet Solutions) to anyone who has a need for large scale hail repairs. Thank you again for your hard work and dedication to seeing the job completed down to the very last vehicle.
