

To whom it may concern;

This letter is to anyone that is looking into International Fleet Solutions, Inc. for hail damage repair. On June 28th 2012, our dealership suffered hail damage, and after a process of being overwhelmed with dent companies, we chose IFS for the job. When they finished repairing our inventory, we said that IF we should ever have another hail storm, we would call them immediately, not thinking it would ever happen.

Then on January 28th, 2013 the unthinkable happened, in a rare event, our inventory of over 400+ vehicles was once again damaged by hail, and we did exactly what we said we would, we called IFS, to come back and help us.

International fleet solutions, has them most courteous and professional staff working for them. If it were not for their efforts in cleaning off the ice and snow making the vehicles clean for insurance inspection, it would have taken a lot longer to get our inventory back on line.

Within a little over three week IFS had repaired our entire 400+ inventory. They did so with precision and speed. They take care of everything from start to finish letting us do what we do best , sell inventory.

International Fleet Solutions is one of the most efficient and organized companies we have had the pleasure of dealing with, and would definitely recommend using them, you will not be disappointed in their work ethic and genuine regard for your inventory.

If you should have any questions in regards to IFS, please feel free to contact Rob Parkhurst, Ron Lubarsky or either one of us.

Sincerely,

A handwritten signature in black ink, appearing to read "Milford Christenson".
