

JM CHEVROLET

March 2022

In March of 2022, our dealership in Lufkin TX was impacted by a hailstorm that caused damage to more than 20 vehicles. There are many hail repair companies out there, and they quickly started coming to the dealership and calling to try to obtain our business.

In the auto business our focus is to sell our inventory and with damage from a hailstorm it becomes more difficult to do that. IFS came recommended to us by another dealer in the area because of the quality, workmanship, and professionalism the team provides.

Once IFS arrived onsite, they quickly started helping us develop a plan to begin the repairs. Working with Ron Martin and the team at IFS was smooth and easy as they worked quickly to repair all our vehicles.

I recommend IFS to any dealer that is facing damage from a hailstorm. The team of professionals at IFS took care of everything and my inventory was back and saleable within days. While I hope to never deal with hail damage again, it's good to know I have an ace in my pocket should it be needed.
