November 2, 2018

To whom it may concern:

We have partnered with International Fleet Solutions multiple times for hail damage repair over the last few years. Tracy Thrall, Bobby Montgomery and their team are highly competent partners in coordination of large scale repair operations (upwards of 800 new and used vehicles per event). Their commitment to keep dealership operations moving as smoothly as possible during repairs is commendable.

The crew is always efficient, courteous, and ever mindful of employees and customers. The work is always high quality. However, they also never quibble is a vehicle needs to be looked over one more time.

I would highly recommend Tracy and his team at International Fleet Solutions if you ever need their services. International Fleet Solutions is on speed dial for us when the first "ping" of hail hits the ground.

Please feel free to contact me with any questions that you may have.

Sincerely,

A handwritten signature in blue ink, appearing to read "Robert McMann".
